FOCUS ON ALTERNATIVE AND COMPLEMENTARY THERAPIES (FACT) AVAILABLE ONLINE

Focus on alternative and complementary therapies (FACT) is now available online at www.pharmpress.com/fact, the result of a collaboration between Pharmaceutical Press, the publications division of the Royal Pharmaceutical Society of Great Britain, and the editors of *FACT* based at the Peninsula Medical School, Universities of Exeter and Plymouth.

FACT online presents the full content of each issue of the journal and holds an extensive archive of past issues from the first issue published in 1996 to the present date. Abstracts presented at the Annual Symposium on Complementary Health will also be made available on the site.

Paul Weller, Publisher, said: "A key development is the online advanced full-text search option where users can refine their detailed search of the content, making the site one of the most important online resources of complementary and alternative medicines literature reviews."

Access to *FACT* online is free for those with a subscription to the print journal. Pay-per-view for *FACT* is currently in development – this will allow customers to purchase specific articles of interest published in the journal via this website. For further information or to subscribe please contact 01491 829 272 or e-mail: rpsqb@cabi.org.
